

LEAPFROG ASPECT

WHERE THE REAL
AND DIGITAL WORLD
MERGE

Geological models are no longer desk bound. Now you can stand in the field, open **Leapfrog Aspect** on your device and see your data superimposed onto real topography.

THIS INDUSTRY FIRST ADDS A **NEW LEVEL OF REALISM** TO YOUR MODELLING.

Leapfrog Aspect advances your modelling with:

VISUAL VALIDATION

Confirm your hypothesis with a contextual check. View the big picture and explore the model in the field to improve understanding.

IMPROVED COMMUNICATION

Gain buy in with compelling visualisation that creates instant wow factor. A model viewed with augmented reality can be easily understood by any audience.

EASY COLLABORATION

Take the model into the field where teams can be brought up to speed quickly. Resource Geologists, Field Geologists and Consultants can collaborate and discuss the model at the source for easy collaboration.

LEAPFROG ASPECT FOR ANDROID

- Download Leapfrog Aspect free from the Google Play store.
- Load Leapfrog Viewer files onto your mobile device.
- Compatible with most Android devices running 4.1 or higher.
